Division

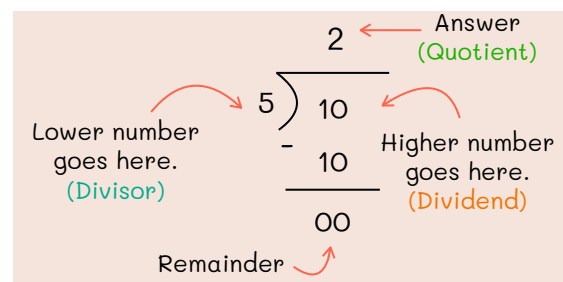

❖ Solve the following division. ❖

✂ Tips:

- ✂ Before learning division, learning the multiplication table helps to great extend.
- ✂ In division, we always start from left unlike other math operation.

Solution:

- ✂ **Step 1:** Check the first number if it is in 4s table. 8 is in 4s table. 2 times 4 is 8. Write 2 in Answer area and subtract that number.
- ✂ **Step 2:** Move to the next number. If that number is not in 4s table, write 0 in answer area and move to next number. In this case, 2 is not in 4s table so we will move to next number.
- ✂ **Step 3:** the next number is 0. Previous number 2 and 0 together makes 20 and 5 times 4 is 20 so we write 5 in answer area and subtract that number from "dividend". Remainder is 0 and hence we complete solving this division.

	H	T	O
	2	0	5
4	8	2	0
	8		
Step 1	0	2	0
	-	2	0
		0	0
		0	0
