## Number Estimate

Estimating number is telling approximate number. Rounding up and rounding down is one way to estimate number.

When estimating numbers, refer to previous place value.

If the previous place value is 0-4 then round down/the number remains same.  $\underline{5}4 \rightarrow 50$

If the previous place value is 5-9 then round up/add 1 to the number.  $\underline{5}6 \rightarrow 60$
